DETAILED ACTION

1. In response to the communication dated September 10, 2002 through December 17, 2002, claims 1-12 are active in this application.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. Figure 1-3 and 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

5. Claim 1 is objected to because of the following informalities: the phrase "Antenna system" should be changed to --An antenna system--. Appropriate correction is required.

Art Unit: 2821

6. Claims 2-7 are objected to because of the following informalities: the phrase "Antenna system" should be changed to --The antenna system--. Appropriate correction is required.
7. Claim 9 is objected to because of the following informalities: "Method" should be changed to --A method--. Appropriate correction is required.
8. Claims 10-12 are objected to because of the following informalities: "Method" should be changed to --The method--. Appropriate correction is required.
9. Claim 8 is objected to because of the following informalities: the phrase "the frequency range from 1.5 to 30" should be changed to --the frequency range from 1.5 to 30 MHz--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

11. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
12. Regarding claim 1, the phrase "adapted to" renders the claim indefinite because it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Art Unit: 2821

13. Regarding claims 3 and 6, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

14. Claim 8 provides for the use of the system, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 8 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Allowable Subject Matter

15. Claims 9-11 are objected.

16. The following is a statement of reasons for the indication of allowable subject matter: the primary reason for the allowance of claims 9-12 is the inclusion of the method steps being transmit the tuning parameters of the master radiating structure to the slave radiating structures, vary at least one of the turning parameters so that they converge and to obtain tuning. It is these steps found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
